Stradale Profile embodies the principle of perfect scalability within Ayrton's Ultimate series, standing as the first ultra-compact luminaire of the brand-new 1 Series. Following in the footsteps of Rivale, it reduces its visual footprint by 15%, achieving this through meticulous engineering and extreme miniaturisation. Every detail was optimised—streamlining the structure, refining effect modules, and minimising component size—to push integration to new limits. This unique format led to the development of an all-new high-efficiency 330 W LED module, precisely calibrated at 6500 K, delivering a luminous output of 20,000 lm with optimal black body positioning to ensure perfectly neutral light. Designed for both indoor and outdoor use in any environment, Stradale Profile stands apart with a distinctive visual signature. Lightweight construction plays a key role in its performance—tipping the scales at just 23.5 kg, it sets an unprecedented benchmark for its category. To unlock new creative possibilities, it features infinite continuous rotation on both pan and tilt axes. Equipped with a 140 mm front lens, its proprietary 13-lens optical system delivers a remarkable 13:1 zoom ratio, with a versatile range spanning from 4 ° to 52 °.

Stradale Profile introduces an all-new ultra-fast CMY progressive gradient mixing system, ensuring seamless colour transitions, brighter output, and impeccable uniformity. A refined extended CTO system allows precise adjustment of colour temperature from 2700 K to 6500 K, while a seven-position colour wheel, equipped with specialised filters, expands the creative palette. For greater flexibility, Stradale Profile offers a fine-tuned colour rendering index adjustment from 70 to 86. The framing system provides precise positioning of each shutter blade across 100% of the beam with a rotation of $\pm 90^\circ$. A rapid 15-blade iris allows beam optimisation with an adjustable range from 15% to 100%. The image section includes 19 high-definition interchangeable glass gobos across two wheels—nine rotating and ten fixed—designed to elevate textural and aerial effects. The effects module features a monochromatic animation wheel and two combinable rotating prisms: a five-facet circular prism and a four-facet linear prism. Additionally, Stradale Profile offers two frost filters: one soft diffusion filter to smooth edges without altering the beam angle and a heavier diffusion filter for true wash applications. Stradale Profile is a one-of-a-kind luminaire, seamlessly merging performance, creativity, finesse, and power—an exceptional fixture with no equivalent on the market.
